

The following Listing of Claims replaces all prior listings, and versions, of claims in the subject patent application.

**Listing of Claims:**

1-24 (Canceled).

25. (Currently Amended) A tape cassette for a tape printer, the tape cassette comprising a body having a base, a top, and sides extending from the base to the top, the body housing a roll of print receiving medium having an axis of rotation extending in a first direction from the base to the top, the body having a guide member on each of two opposing sides extending along said sides in a second direction perpendicular to the first direction for guiding the tape cassette into a tape printer in the second direction and locating the tape cassette in the tape printer, wherein each guide member extends outwardly from its respective side and comprises a first elongate member disposed in a plane perpendicular to a plane of its respective side and a second elongate member disposed in a plane parallel to the plane of the respective side, said first elongate member having a first end attached to its respective side and a second end spaced from its respective side, and wherein said second elongate member is attached to said second end of said first elongate member and extends at least partially along a length of said second end, and wherein one of said sides of said cassette other than said opposing sides includes an opening at which tape passes over a platen in the cassette, each guide member extending from an end of its respective side opposite said side including the opening.

26-28. (Canceled)

29. (Previously presented) A tape cassette according to claim 25, wherein each guide member has a substantially T-shaped cross section.
